B. H. BOWER
Proprietor and Manager

Dear Patrons:

In issuing this new list of plants, we wish to express our appreciation for the splendid patronage you have given us, in the past. In the spring the 1935, we were rushed with orders and local trade, without a word of advertising. We thank you very much. It is our custom to give value for every dollar spent with us and while we take every precaution to avoid errors, should a mistake occur, through new help, or otherwise, we cheerfully give the right plant, where by any cause, the wrong one has been delivered.

This, our new 1936 list of plants and prices, is not a complete list, but covers the widely known plants, and some newer ones. The past few years has seen quite a turn from shrubs that loose their leaves in the fall, to the more showy evergreen plants, which blend nicely with evergreen trees.

We have ninety-six kinds of Shrubs, and can furnish others, if you are interested.

INSTRUCTIONS

to planters

When trees or plants arrive, dig a hole or trench, throwing dirt to the west or south of hole, remove packing, place the trees, or plants, in the trench, tops to the south or west; this is to avoid sun scald; wet thoroughly, cover with at least four inches of dirt well up above the roots, firm the dirt with ball of foot or shovel, always keep roots from sun and wind, and water when you plant, firm dirt well around the plant and place mulch of loose dirt on top. A light mulch of barnyard manure, or peat moss, around each plant, helps keep the moisture in and the sun rays out. Water again in a few days, and never let it get free from moisture.

Apple Trees

1 to 10 Trees	50 cents each
10 to 25 Trees	35 cents each
